QUALITY POLICY

01/09/2020 rev. 2

WECO is a well-established company run by experienced top managers who boast a decades-long industry know-how. Each product is manufactured after in-depth studies, supported by accurate and safe design systems and calculations, followed by stringent tests carried out on all the products during each critical stage. To become a “quality” company, WECO has decided to reaffirm its core values and to focus its efforts in pursuing the following macro objectives:

- Developing innovative and cutting-edge solutions;
- Manufacturing quality equipment;
- Manufacturing reliable equipment over time;
- Providing a *Service* able to meet customer needs by directly supporting its *partners*;
- Ensuring compliance with product related standards;
- Promptly processing orders by applying LEAN principles.

In order to fulfil the above listed objectives, WECO aims to:

- Carefully and periodically analyse its business backdrop to better pursue the above listed goals, minimising risks and seizing the right opportunities;
- Ensure reliable and documented checks which will be used, if necessary, to make the most appropriate corrections: “never supply non-conforming products”;
- Ensure an adequate traceability of activities undertaken and components and materials used;
- Regularly analyse the data required to reach the objectives of all its primary processes;
- Invest on its internal organisation by specifying tasks and responsibilities in order to pursue its pledge to continually improve its corporate structure;
- Promote people's professional development;
- Pursue customer satisfaction.

In striving to ensure on-going improvement, this quality policy will be reviewed every year by Management, and will be sent to all parties concerned by using the most convenient methods and timescales.

The Management
